Count weight changes whether class-specific location is dispensable

Pre-only bounds; 1% prediction-preservation budget. This is not an Accuracy comparison.

Scope: WikiCS, Roman-empire and Amazon-ratings; 3 depths × 10 new support draws per graph.
All 330 conditions from the other 11 graphs abstain. Moment0 shown; moment2 gives the same group decisions.
Panel B: segments are pre-only disagreement bounds; dots are later verified disagreements. Ordinary float64 audit.
